

## GERMANS FIND COAL FIELD.

AMSTERDAM, Aug. 23.—Vast coal fields have been discovered in Silesia, according to German reports. In some places the vein is twenty-two meters thick. It is expected that these coal fields will be exploited at an early date and that preparatory work will begin in September.

## GRAVES TO BE INTERRED.

KANSAS CITY, Mo., Aug. 23.—Instructions to intern Karl Armauer, German spy, self-styled international spy, were received here from Washington by Francis M. Wilson, United States district attorney. Graves were arrested here last week and Mr. Wilson recommended that he be incarcerated.

## HINDENBURG NEAR RIGA.

COPENHAGEN, Aug. 23.—Field Marshal von Hindenburg, German chief of staff, is reported in German advices today to be directing personally the German offensive against the Russians southeast of Riga. Von Hindenburg went to the eastern front several days ago.

WOMEN WORKERS  
TO DON BLOOMERS  
AT DU PONT PLANTSHow to Be Rid of  
Dangerous Dandruff

The only possible way to permanently get rid of dandruff—the sure hair destroyer—is to remove the cause. Shampooing merely cleanses the scalp for a few days, then the dandruff scales appear again as thick as ever. It was Dr. Sangerbund, the famous Paris Specialist, who discovered that dandruff and falling hair are caused by a microbe. Then came the discovery of the value of genuine Parisian sage (liquid form) to destroy the dandruff germ and promptly prevent the further loss of hair. Get from your druggist about four ounces of Parisian sage, and rub a small quantity well into the scalp, you will be amazed as the result of even one application, for your hair and scalp will look and feel 100 per cent better. Only a few applications are needed to destroy the germ that causes dandruff to form, your scalp will immediately feel cool and comfortable, and your hair appear soft, bright-looking and seem heavier than it really is. Since Dr. Sangerbund's discovery the American people are realizing that dandruff is as unnecessary as it is dangerous, and that they can be quickly rid of it and save their hair by a few days' use of this simple, inexpensive and harmless treatment. Be sure you get the genuine Parisian sage (Giroux's), for this brand is delicately perfumed, will not stain the hair and has the guarantee of perfect satisfaction or money returned printed on every package. O'Donnell's Drug Store can supply you.—Adv.

WILMINGTON, Del., Aug. 23.—The du Pont company will, in a short time, employ women in the powder plants at Carneys Point. They will wear bloomers and will be placed in the cutting houses, where the work is light, and where, it is believed, they will be able to give good service, as soon as they become familiar with the operations.

This step has been determined upon by the company because large numbers of men will be called into the army by the draft, depleting the labor supply from which these workmen were ordinarily recruited to fill vacancies occurring in the powder plants. The wages paid the women will be commensurate with their skill and output, and there will be no attempt to utilize their services to get cheaper labor.

It is proposed to employ at first about 200 women at Carneys Point. They will be engaged as soon as the company completes the comfortable new quarters it is preparing for them. Two large houses are to be constructed and placed at the disposal of the women.

BERLIN TO KEEP  
STEEL FROM DUTCH  
UNTIL WAR ENDS

By DAVID LAWRENCE.  
(Continued from Page One.)

that Dutch shipyards would rather close up than agree to the conditions imposed.

Apparently the United States Government sympathizes deeply with the plight of Holland, and the State Department doesn't hesitate therefore to let the American people know what the German policy of ruthlessness means even to so peaceful a nation as the Dutch. Yet Chevalier Van Rappard, the Netherlands minister, today said that no amount of economic pressure would force Holland into the war.

## "Will Suffer More."

"I am not informed," he said, "as to the latest order with respect to steel, but this much I do know definitely: Holland will not be dragged into the war by economic means. We have suffered much and we will suffer still more. In fact, we will suffer anything except invasion. We will continue the war if we are attacked. We will fight whichever side attacks us."

The nearer the German forces are driven toward the Dutch frontier by the allied offensive in Flanders, the more critical becomes the position of Holland. Valuable submarine bases have been built by Germany along the thirty-mile stretch of Belgian coast now held by them. Shut off from these bases, the German naval line would be pushed back 200 miles unless Germany violated Dutch neutrality under Emperor William's famous formula of "strategic reasons."

## May Be Forced Into War.

In many quarters here, of course, Germany's pressure on Holland and the other neutrals is taken to mean that her internal condition is very distressing, and that she may in the end compel Holland, Denmark, and Switzerland to share their food supplies with her. The entente countries, fearing this, are exercising a most effective restraint already by means of embargo and blockade on the exports to European neutrals.

How long the little countries will be able to bear the strain without definitely aligning themselves with one or the other sets of belligerents is difficult to predict. Incidentally, the entente governments can feel little satisfaction over their own proclamation of a post-bellum trade war as outlined in the Paris economic conference when they see Germany trying to bring about the same thing with the co-operation of Holland.

The United States has never signified its adherence to the agreements made at that Paris conference; in fact President Wilson's speeches have shown clearly that the United States does not mean to keep up trade rivalry and economic friction after peace is declared. In the meantime, there is the most intense interest in the action that Holland will take in answer to Germany's new form of coercion.

BURLERSON DECLARES  
EDITORS INIMICAL

Postmaster General Burleson believes that the editors of the Masses and the Jeffersonian are leaders in a propaganda to discredit and handicap the Government in its prosecution of the war.

In a communication to Senator Bankhead of Alabama, chairman of the Committee on Postoffices, the Postmaster General gave his reasons for this declaration. He said, however, that the editors in question do not go far enough in their campaign to cause their arrest by the Federal authorities.

The Mitchell Club Roadster  
An Extra Smart Car

## One of the 8 New Mitchell Styles

EVERY Mitchell body is a distinctive style. All are built by master craftsmen in the new Mitchell body plant. All are designed exclusively for Mitchells.

They combine all the known attractions. Before designing this year's models Mitchell artists examined 257 new styles. So every popular touch was considered.

There are two sizes of Mitchells, at two basic prices. And eight very up-to-date bodies. You will find a hundred things to interest you in them.

## The Sport Car

The latest style of speed car is the Club Roadster. It's a racy-looking car. You will find it, we think, the smartest car of its type.

We have it on show today. But this type is selling faster than the makers can build it. So we urge you to come while we have it.

## Convertible Cars

The all season models are enormously popular, even for summer driving. They change from open cars to closed cars in a moment.

No wind, no dust, no sudden storms affect one in these cars. Yet on pleasant days they are just as open as Roadsters or Touring Cars. The demand for these models shows how people are seeking riding comfort.

Added Luxury  
Without  
Added Price

The charm of Mitchells lies in things which other

cars omit. There are 31 extra features and many added touches.

The bodies are finished in 22 coats, and the finish is fixed by heat. So the cars stay new.

The extra-grade leather costs one-half more than the usual grade employed. It is laid in plaits—not tufted.

There are handles for entering, a light in the tonneau, a locked compartment for valuables.

The luxury cost in one year has increased 24 per cent. But the savings made in the new body plant pay for all this added beauty. Most fine-car makers buy their bodies, so they lose this saving.

## Other Attractions

Mitchells have a power tire pump. They have an engine primer at the driver's hand. They have a ball-bearing steering gear which a finger turns.

They have Bate cantilever springs—shock-absorbing springs—the easiest riding springs ever invented. And not one has ever broken.

Every vital part in Mitchells has 100% over-strength. That is twice the usual margin of safety, and it means a lifetime car.

You will find in Mitchells a hundred things which other cars don't show. Come see what they mean to you.
